· Additional toxicological information:

This product is extremely irritant for the eyes. Just a few drops of it might cause irreversible lesion and permanent injury of the cornea. If there is a skin contact, it might cause irritation, skin-rash, swelling and chapping. The inhalation of its vapours causes cough, headache and irritation of the respiratory system. Swallowing causes strong irritation and burn of throat and stomach. Perforations of the mucous membranes might occur and depending on its quantity, it might also cause the death of the injured person. The organic peroxides are dangerous for the organism since the peroxide oxygen is reduced to radical that induces into the cellular metabolism.
